

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

Claims 1-17 (cancelled)

Claim 18 (currently amended) A capture frame apparatus for capturing a frame image from a computer having a display, wherein the frame image is a subset of the ~~an~~ image to be displayed by the display, the capture frame apparatus comprising:

means for accepting user input;

means for translating user input to boundary positions for boundaries around the frame image, wherein the boundary positions are settable to positions independent of the boundaries of the display and independent of the boundaries of any window on the display; and

means for displaying the frame boundary positions on the display.

Claim 19 (original) The capture frame apparatus of claim 18, wherein the means for displaying a frame boundary is a display interface programmed to display four one-dimensional windows as four sides of a frame, thereby forming a transparent window

Claim 20 (currently amended) A method for capturing frame image data comprising:

copying image data from a frame buffer on a source computer, ~~where~~ wherein the source computer is a computer of a first platform and the image data is in a first image form associated with the first platform;

wherein a destination computer is a computer of a second platform different than the first platform and a second image data form associated with the second platform is different than the first image data form, transcoding the image data from the first image data form to the second image data form; and

transporting the image data to the destination computer for display in the second image data form.

Claim 21 (currently amended) The method of claim 20, wherein the step of copying further ~~compress~~ comprises a step of selecting where in the source computer to perform the copying based on where the image data to be copied is in a transcodable form.

Claim 22 (cancelled)
